

EPIC LIGHTING

Warranty Description for Lighting Products

Our warranty covers manufacturer defects that occur under normal use and conditions. This includes issues such as improperly sealed light housings that allow water to enter and flood the interior of the lens, as well as internal defects like loose or broken components inside the unit, such as diffusers, reflectors, or bulb shields.

The warranty does not cover:

- **Accidental Damage:** Breakage caused by collisions, road debris, or accidents.
- **Improper Use or Installation:** Damage resulting from aftermarket modifications, incorrect installation, or misuse.
- **Wear and Tear:** Normal aging, including bulb burnouts, lens yellowing from UV exposure, or surface scratches from regular use.
- **Bulbs:** Bulbs are not covered under this warranty.
- **Electrical Issues:** Since the light assemblies are housing and lens components only, electrical malfunctions are excluded.
- **Condensation or Moisture Buildup:** Fogging or condensation caused by weather conditions or climate variations is not covered.

This warranty ensures your product is free from defects in materials and workmanship under proper use. If you experience an issue not listed under exclusions, please contact us for further assistance.
